

STEINAR RAKNES

## Time From Beyond

*All songs start from the heartbeat of the land  
Leaving footprints in the sand  
Everything has a song to bring you home  
To make you look at time from beyond*

*Leaves swept away, the wind blows 'em back  
By the rules of the earth and the breath of life  
In my dreams I am seeing things  
That help me look at time from beyond*

*Seven sisters made the earth  
Singing and dancing of joy  
and mirth  
Planting their seeds under the sun  
The source of life from a time from beyond*

*The sun is fire, and fire's within you  
Keeps you going, whatever you do  
Give your warmth to the people that you meet  
On your path to a time from beyond*

*We have light and we have love,  
We have dance and we have song  
Life is forever, the earth to be  
The essence of life from a time from beyond*
